\$ 43 25

\$812 04

There has been sold from the farm and applied on accounts ;—eggs, \$4.74; butter, \$7.51; potatoes, \$5.00.

Mr. Bickford died very suddenly October 22, 1900. Mrs. Bickford continued on the farm until January, 1901, when she resigned the management, and we engaged T. C. Huntress and wife to complete the year.

There are now on the farm—2 cows, 4 pigs, 64 hens, 3 tons hay, 1 1-2 bbls. pork, 3 bu. turnips, 15 bu. potatoes, 3 bbls. apples, 1 bu. onions, 50 lbs. lard, 1 ham, 4 bu. beans. The supply of bedding and household articles needs replenishing.

There are now on the farm Lizzie Goodwin, 74; Mrs. Callahan, 73; Samuel Porter, 81; Horatio Willard, 66; B. L. Bragdon, 57; Jere Littlefield, 77; Nelson Londo, 77; Thatcher L. Jones, 64; Olivine Bernier, 22 and child; Joseph Vallier, 32; Jimmie Cooligan, 12; Susie Bragdon, 8.

B. F. Moranvill died Sept. 4, 1900.

	\$1586 79

The suit against the town of Fryeburg for account of support of Ethel M. Edgecomb in the Insane Hospital was decided against Sanford, on the ground that the notice was insufficient, having been given January 14, 1899, and the last payment preceeding it having been made October 11, 1898, more than three months before.

	} of
	} Sanford.

This is to certify that I have examined the accounts of the town of Sanford, as shown me by the selectmen, and find them to be correct as shown above.

W. H. WOOD, Auditor.

REPORT OF THE Superintendent of Schools

FOR THE YEAR ENDING FEB. 22, 1901.

TO THE SCHOOL BOARD AND CITIZENS
OF SANFORD:

The following report of the condition and progress of the public schools of Sanford is respectfully submitted.

SOME OF THE MOST IMPORTANT CHANGES.

The adopting of a Graded Course of study for the village schools.

The introduction of Music in the village schools.

The introduction of Drawing in the village schools.

Teacher's meeting each term.

The closing of four rural schools and the pupils conveyed to graded schools.

The School Improvement League.

GRADED COURSE OF STUDY.

In previous years we have been pleased to call the schools of district 1 and 2, graded schools but how, when and where they were graded, no one knew. The teachers did not know how far they should advance their classes during the year. The pupils were advanced more by size than by ability. Consequently when the pupils come to enter the High Schools, they are ahead

of the requirements in some branches, while they are behind in others.

By adopting a Graded Course of study, we have accomplished much better results. In this course the work is arranged for each term, so that every teacher knows what and how much she is required to do. While we do not claim that the present Course is perfect; we do claim that the schools are a great deal nearer graded schools than ever before.

With the introduction of Nature Study, we have touched sympathetic chords in the pupils. In the study of plants and animals, the pupils study LIVING things and LIFE appeals to the child. While it would not be wise in this study to work too far on a single feature; the teachers have endeavored to bring before the pupils a few points which will suggest to the wonderful beauties of Nature. Honest work in these lines will develop in the pupils, habits of observation which will not only be of temporary value but will be a permanent possession.

MUSIC.

Miss Susan E. Frost formerly assistant in the Lincoln High School, has devoted the entire year to the instruction of vocal music in the Lincoln and Longfellow schools. The results obtained by Miss Frost in this department show the same careful preparation of each days work, that were manifested during her connection with the high school. No one familiar with the work accomplished under Miss Frost's supervision, would question the advisability of continuing this important department.

DRAWING.

At the beginning of the Fall term, Prof. A. G. Randall of Dover, N. H. was engaged to teach Drawing in the Longfellow school. This being a new department, unfavorable comment was expected. However Prof. Randall through his untiring efforts has accomplished phenomenal results. At the end of the Fall term he gave a public exhibition of the work done dur-

ing the term; by doing this he not only succeeded in obtaining nearly \$50.00 with which to purchase art material, but he presented sufficient proof to those who attended, that Drawing should have a place in our schools. During the Winter term Prof. Randall with the assistance of Mrs. Randall, continued the work in Longfellow school with the same excellent results. The Course was also introduced into the Lincoln school and it is unnecessary to say that the terms work should receive equal commendation.

It is my hearty recommendation that the Drawing department be continued under these efficient instructors.

TEACHER'S MEETING.

Believing that teachers receive a great amount of help by attending educational conventions, where able discussions are presented; I arranged two special conventions during the year, which received the active support of the teachers. The good results of these meetings were distinctly manifested in most of the schools.

RURAL SCHOOLS CLOSED.

At the close of the Spring term the School Board voted to close the schools in districts 8, 9, 11 and 16, and transport the pupils to the village schools. The school in district 16 was re-opened at the beginning of the Winter term but the others have remained closed. If all of the rural schools, with perhaps the exception of one could be closed and the pupils transported to the village schools, the town could save at the least estimate \$500.00 a year. If this were the only benefit which could be derived I should not support it under any consideration for I do not believe in depriving the pupils to aid the town.

As a rule we find the most experienced teachers in the graded schools. In large schools better work can be done than in smaller schools, because the pupils can be more closely graded and if one is promoted or put back in class the interval is a short one and the pupil suffers no serious loss in his studies.

In the rural school we find the teacher is compelled to teach everything, from the alphabet to philosophy. I have visited one school where there were not over twenty pupils yet, there were thirty-one classes to recite every day. Where such conditions exist no teacher can accomplish work that will in any way compare with the work of the teacher in the graded school.

Again in our graded schools we have Drawing and Music taught by professional teachers; the value of these studies to the pupils throughout their entire lives, cannot be estimated. Yet, we cannot provide these studies for the rural schools.

In conclusion, is it not a great deal better for the pupils to ride three miles to the village schools, where they can be sheltered in a suitable building with modern appliances, than for them to walk one mile to a rural school, where comfort is an unknown quantity, especially in cold weather?

However if it is the minds of the citizens of this town that the rural schools should not be closed, there is but one thing to do. The town should raise a sufficient amount of money to put the rural school houses in suitable condition, and provide enough teaching force to do equal work with the graded schools.

SCHOOL IMPROVEMENT LEAGUE OF MAINE.

This is an organization founded by our State Superintendent of schools, W. W. Stetson. Its objects are: Better Physical Surroundings, Best Books for All, Art in the School Room.

The good results are seen in the many beautiful pictures, placed in the different schools; the naming of all of the school buildings after some noted and worthy person. On Feb. 27th, 1901, a life size bust of Longfellow, (the gift of the pupils and teachers in Longfellow Building) was placed in the main corridor of the Longfellow Building and unveiled with appropriate ceremonies.

The work in each separate school will be found in the following tables:

Name	Term	Number	Teacher	Grade	Number of pupils	Average	Total number	Total number	Total number	Number visits

*No Report.

Following are the assistants of the two high schools: Miss Ethel Hobbs assistant, Lincoln High School; Miss Mabel Ridley assistant, Longfellow High School; Miss Mary L. Trafton assistant, Longfellow High School; Miss Susan E. Frost, music; Prof. A. G. Randall, drawing; Mrs. A. G. Randall, drawing.

In the foregoing tables, the large amount of tardiness is not the fault of the teachers. I would suggest that the parents use a little more discretion in granting excuses to their children for being tardy; for it has a bad effect on discipline and it is certainly annoying to have so many come in late.

HIGH SCHOOLS.

Prof. F. C. Thompson was elected principal of Lincoln High School July 2, 1900. Rev. F. G. Davis having resigned.

During the summer vacation, Miss Mabel Ridley resigned as assistant in the Longfellow High School and Miss Mary L. Trafton was elected.

As only thirteen pupils graduated from the two high schools at the end of the Spring term and forty-one entered at the beginning of the Fall term, the schools were somewhat crowded. If these schools increase in the same proportion next year, each school will have to be provided with more room.

If the citizens cannot agree to unite the two high schools, they should appropriate a sufficient amount to equip each school with a laboratory and sufficient apparatus: also \$1000.00 for the principals and \$500.00 for the assistants.

CONCLUSION.

During the year I have made 220 official visits. I have kept an accurate account of the distance travelled during the year, and I find that I have driven 811 miles.

Four weeks have been added to the school year, making a total of thirty-six weeks.

After all bills due on the past year's account are

settled, there will be a balance of nearly \$2000.00 for credit to the school fund.

In closing, I wish to heartily thank the teachers for their earnest co-operation and the kind way in which my suggestions have been received and complied with during the year.

I would also acknowledge the aid and support received from the School Board.

Respectfully submitted,

MYRON E. BENNETT,

Superintendent of Schools.

1902

Annual
Report
of the
Town of
Sanford.

For the Year Ending
February 22. 

Our Creed:

*We believe in reliable
goods of known value;
also in selling goods,
not keeping them.*

In cheerfully exchanging or refunding the purchase price when not satisfactory. We believe in advertising and living up to our printed statements. In giving satisfaction to our customers and feeling that they are not only the best, but the truest advertising mediums.

We are getting together the most complete assortment of Spring goods ever shown in this vicinity. Men's Boy's and Children's Spring Suits in an endless variety of stripes and shades. Suits that suit, we have hundreds of such. Our reputation is dyed, spun, sewed and wove into every one of them. Your suit is in the lot waiting for you. It's just your fit, its just your idea of a good suit, and just your price. All the leading lines of Men's, Ladies' and Children's Boots, Shoes, Oxfords and Sandles. Thousands of Fancy Shirts and an abundance of Elegant Neckwear. A hundred dozen of popular price Fancy Hose. New Underwear, Collars and Cuffs. All the new shapes and shades of Hats and Caps. There are no crooks and Covers to our business policy, but a straight open path back to the money till, if for any reason you're not satisfied

"We don't follow the leader"

"We lead the followers"

“ Main street, “	420 20
Stone curbing and grading for sidewalks,	138 75

The balance left from the appropriation for School and Emery streets was used by the road commissioner for grading and draining those streets. The Sanford & Cape Porpoise Railway Company were short of power for a time and also were delayed in getting into operation certain improved apparatus which they now have in use for the lighting department; and to compensate the town for the defective lights thus occasioned have allowed a discount of two months from their bill, which ought to be satisfactory to every voter. They are now prepared to give us good lights, and will do it.

The loan authorized by the town for the building of a high school house we were not able to place to advantage, as the law of the state is interpreted to allow towns to issue bonds to pay an existing indebtedness, but not in anticipation of a future indebtedness. We have therefore made temporary loans to cover the cost of the building as it has progressed, which can be replaced by time bonds when the town is in debt to the amount for which they wish to issue bonds. The building committee will

in due time report the details of their operations ; all we need now say is that we have drawn orders on account of the building to the amount of \$15,005.75.

From the appropriation for breaking roads for the winter of 1900-1901, we paid S. R. Day for snow roller, \$135.30; F. A. Smith for shed for the roller \$15.80; and the tax collector for orders of commissioners Moulton and Wentworth returned to us \$852.44. Amount overdrawn \$3.54.

The summer appropriation has been expended under the direction of Road Commissioner E. M. Goodall, whose report we submit. We have paid a few old bills and other accounts, mostly some that came in after his report was made and he had gone to Florida, as follows :—

Samuel Worster, watering trough,	\$ 3 00
J. H. Makin, pipe,	2 05
Levi Harmon, work,	98
S. & C. P. Ry., freight,	40
F. S. Sherburne, pipe 1900,	14 50
O. R. Willard, watering trough,	3 00
Sanford Carriage Co., repair of wheels,	9 07
A. H. Ducharme, work,	10 50
Ross & Webber, supplies,	19 96
Moulton Bros., plank for Johnson bridge.	5 78
E. M. Goodall, salary,	2 00
Commissioner's orders returned by tax collector,	5821 78
	<hr/>
	\$5893 02
Commissioner's orders outstanding,	112 21

REPORT OF THE Road Commissioner.

To the Selectmen of Sanford:

I herewith transmit a brief report of work done on the highways the past season, with a few suggestions for the town to act upon for the ensuing year.

Amount appropriated for repair of roads and bridges,	\$5000 00
--	-----------

Amount available from sidewalk appropriation and amount appropriated for grading Elm, Emery and Jackson streets,	727 45
--	--------

Total,	\$5727 45
--------	-----------

I have expended during the past year according to vouchers herewith transmitted, \$5933 99

There was a bad washout on the highway near Whicher's Mill during the freshet last spring, which cost \$59.16 to repair. This was caused by water running over the top of the wing dam of the mill pond. A few years ago the dam was rebuilt and the roll way raised ten inches higher than the old one without increasing the height of the wing which runs parallel with

the highway. Mr. B. C. Jordan's attention has been called to the matter and he will probably take measures to protect the road in the future if he has not already done so.

The heavy and continued rains in the spring, when the frost was partly out of the ground caused large washouts all over the town which left the roads in very bad condition when they were ready to commence work on.

Particular attention has been paid the past year to opening up the gutters and culverts on the hills to save a repetition of the damage the coming spring.

The roads are now in fairly good condition although there is yet chance for improvement, and an equally large sum of money should be raised this spring as last to keep them up and continue the improvements.

A twelve inch sewer has been laid on Emery street from School street to the river, to drain that portion of Sanford village and Allen street; and catch basins put in at the corner of School and Emery streets and Emery and Allen streets, at a cost of \$628.43.

Several other catch basins have been put in in Sanford village and connected with private sewers. Main street has been turnpiked and graded so that the village is very well drained at present.

The grade on Emery street near Cross street has been lowered two feet, and the dirt used in grading other streets.

The sand hill near the Hay brook on the lower road to Alfred has been turfed, also the sand hill near the house of James Phillips.

Oak street in Springvale has been graded and widened where needed, and is now in good condition.

The following bridges have been repaired : Bridge near the power station on the depot road, Willard bridge, Davis bridge in the lower part of the town, Great Works bridge near the old Tibbetts saw, mill, the bridge near James Phillips's and the one near Butler's Corner.

There have been several old stone culverts taken out and replaced with twelve and eighteen inch drain pipe.

Washington street in Sanford village has been macadamized and the wooden bridge at the foot of the hill replaced with a permanent one composed of brick and iron, at no expense to the town.

I would make the following recommendations for the ensuing year for the town to act upon : There should be a catch basin put in on the northerly side of Elm street, and one on each side of Cross street in Sanford village and connected by an eight inch pipe, with the sewer on Emery street. Estimate cost \$200.00.

There should also be a catch basin on each side of Emery street near the residence of General Bean, connected with the High school sewer or the one from School street to the river, with an eight inch pipe. This would drain the lower end of the village in a satisfactory manner. The cost of this last item would be about \$200.00.

There should be \$1,500.00 appropriated to macadamize Main street in Springvale from Mill street to the foot of the hill near the Smith residence, and several of the trees removed where they are too close together, in order to allow the sun to shine on and dry up the street.

I would recommend the appropriation of \$700 00 every year for the purpose of erecting one arch or iron bridge, thus saving the constant danger of injury to the traveling public and a large annual bill for repairs.

Something should be done to take care of the sewage from Cottage street in Sanford. At present it runs through a short sewer and is dumped into the swamp at the head of the old muck hole. In a comparatively short time the accumulation there will be a source of danger to the health of the inhabitants in that section. A large sewer should be laid through the swamp and discharged in the river. Cottage street should also be graded so as to take care of the surface water.

The sidewalk on Washington street from S. B. Emery's store should be lowered and made to conform to the contour of the street, as at present it is dangerous during the winter months.

I would recommend that the Bean road, so called, on Mount Hope, be discontinued, as it is very little used, and if kept passable will cost quite a sum of money every year. The past year it cost \$64.88 to repair this road.

An appropriation should be made for the purpose of straightening Main street between Sanford and Springvale, as laid out by the County Commissioners.

Respectfully submitted,

E. M. GOODALL, Road Commissioner.

Sanford, Maine, Jan. 17th, 1902.

" " 2 cows,	45 00

\$110 62

\$1,397 71

Other receipts from the farm have been applied on grocery and other accounts, as follows: Eggs, 24.09; butter, \$17.32; milk, \$3.14; peas, \$1.50; veal, \$11.20; poultry, \$3.70.

Mr. and Mrs. Frank G. Tebbetts were engaged to carry on the farm for \$400 per year. They remained until Dec. 15, when they resigned the place, and we engaged Mr. and Mrs. George W. Perkins to complete the year. There has been considerable sickness during the year and the work has been quite hard. The additional house room was not provided any too soon, as the family has numbered over 20 for several weeks at a time the past season.

We have had lumber cut for an ice house, which is now built and filled with ice, and part of the lumber for

a hen house, which should be built early in the spring.

There are now on the farm—3 cows, 1 horse, 60 hens, 4 tons hay, 1 bbl. pork, 50 lbs. fresh pork, 8 bu. potatoes, 20 lbs. lard, 3 bu. beans, 1 bbl. beets, 1 new wagon, 1 new sled, 1 new harness, 1 good work wagon, 1 mowing machine, 1 plow, 1 harrow, 1 cultivator. The list of other tools, furniture and household supplies is preserved in the selectmen's record book and it is not thought necessary to print it.

Those now on the farm are—Lizzie Goodwin, 75; Mrs. Callahan, 74; Samuel Porter, 82; Horatio Willard, 67; B. L. Bragdon, 58; Nelson Londo, 78; Olivine Bernier, 23; Louis Bernier, 1; James Cooligan, 13; Daniel Twambley, 70; Mrs. Rollins, 63; Julia Londo, 51.

Mrs. Isaac Wilson was on the farm part of the year. The families of Fred King and Joseph Martell, numbering 6 and 7 each were on the farm several weeks early in the spring, but fortunately not at the same time.

Jere Littlefield died Sept. 9, 1901. Thatcher L. Jones died Feb. 17, 1902.

 \$25,500 83

Excess of liabilities, 15, 664 80

Deducting the amount expended on the new high school building the excess of liabilities would be \$659.05, instead of \$1355.28 as last year.

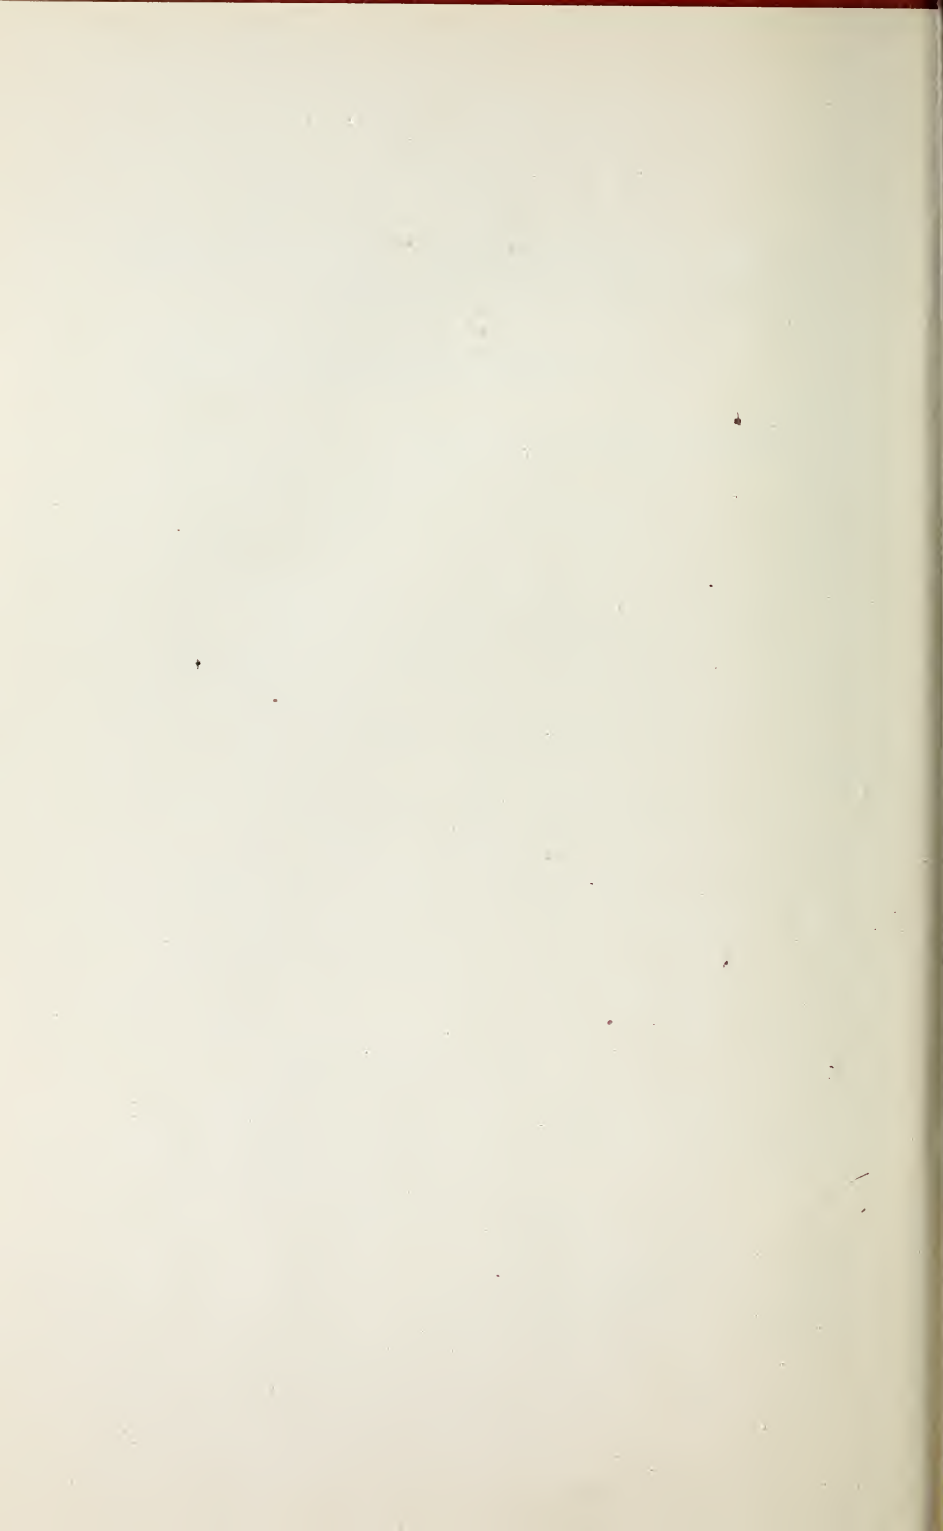

Respectfully submitted,

GEO. W. HANSON,	} Selectmen of Sanford.
C. F. MOULTON,	
W. C. REMICK,	

This is to certify that I have examined the accounts of the town of Sanford, as shown me by the selectmen, and find them to be correct as shown above.

JOHN HARGREAVES, Auditor.

Sanford, February 22, 1902.

REPORT OF THE Superintendent of Schools.

TO THE SCHOOL COMMITTEE AND CITIZENS
OF SANFORD :

I hereby present my annual report for the years
1901 and 1902.

The number of pupils attending our public schools
at present is 903. No fair comparisons can be made
with the statistics of last year because the two tables
do not cover the same period of time. The public
schools are organized as follows :

Lincoln school, high school 53, grade eight and
seven 30, grade six 33, grade five and four 51, grade
three 37, grade two 42, grade one 52; total 298.

Longfellow school, high school 35, grade eight 17,
grade seven 35, grade six 52, grade five 58, grade four
59, grade three 61, grade two 54, grade one 66, grade
one 35; total 472.

Hawthorne school, grades seven to one 18.

Edison school, grades six to one 27.

Holmes school, grades eight to one 18.

Grant school, grades seven to one 13.

Whittier school, grades six to one 13.

Jefferson school, grades eight to one 17.

Bryant school, grades eight to one 12.

Franklin school, grades eight to one 15.

The town has good reason to feel proud of the corps of teachers who are now in charge of the schools. With the exception of two schools the work has been done exceptionally well.

Regular teacher's meetings are held, under the direction of the superintendent, for the purpose of increasing interest, comparing individual experience and general improvement.

These meetings have certainly created a stimulating influence among the teachers.

Education in its fullest sense is the development of all the faculties, moral mental and physical, and its chief purpose the moulding of character. The best qualification of a teacher is the ability to inculcate morals, and teach pupils how to think, act and live. This is accomplished not by any systematic course of study, but indirectly by the teacher in the daily routine of work. It is my policy to give the teachers a wide latitude for the completest exercise of their individual judgment and to leave them unhampered by definite rules or special directions. A catalogue of "do's" and "do not's" may serve the operative in a factory, where the material conditions remain fixed; but the teacher, with whom the conditions are perpetually varying, must be guided by a principle which tact and ingenuity may apply to each new case as it arises.

Music and drawing are taught in every grade of the Lincoln and Longfellow schools, in such a manner as to

combine and confirm the fundamental subjects of elementary school work, for though our schools are established primarily to teach reading, writing, spelling and arithmetic; there is no way of making these very important subjects more interesting and practical than to lift them out of the dull routine of the past, and to make them touch many phases of life and thought instead of one.

NEW BUILDING.

One of the most important features in the history of our schools, is the erection of what will be, the most convenient and most satisfactory school building ever erected in this town.

It will be completed September 1, in time for the fall term. The building is designed to accommodate 350 pupils, and it is so arranged that it may be used for the high school alone, or the high and grammar schools combined.

The Building Committee have very carefully considered the essential points of a modern school building, namely; heating, lighting and ventilating. In fact the building is being constructed according to the very strict laws governing public buildings in Massachusetts.

In the next report a complete description will be in order.

HIGH SCHOOLS.

The high schools are at present doing very satisfactory work. At the end of last spring term much unnecessary comment was made because, I refused to sign

the diplomas of some whose tests plainly indicated that they were not qualified to graduate. At the Lincoln high school, Prof. Thompson supported me in my decision and the affair was properly adjusted. At the Longfellow school, I not only failed to receive support in my decision ; but I was falsely represented. Consequently the diplomas were given out without my signature.

During my connection with the school system of this town, I have tried to raise the standard of the schools, by insisting that every pupil should satisfactorily complete the work required in the course of study ; before passing to a higher grade or graduating from the high school.

The value of a diploma, lies in the quantity and quality of work required to obtain it, and not in the number of signatures attached to it.

During the year the teachers have purchased over \$450 worth of reference books. With two exceptions, every teacher is a regular subscriber to one or more school magazines. Every teacher has attended at least one convention.

These manifestations of self-improvement, on the part of the teachers, are a new development, and when salaries are considered, wonder must be mixed with praise.

Last year this town raised \$5000 for support of schools, or \$2.40 per scholar. The average amount raised by the towns in this state was \$3.64 per scholar. In other words 433 towns raised more money, per scholar, last year than Sanford.

We were told recently, by a prominent educator, that, "in our schools, the same as in everything else, we would get only what we pay for."

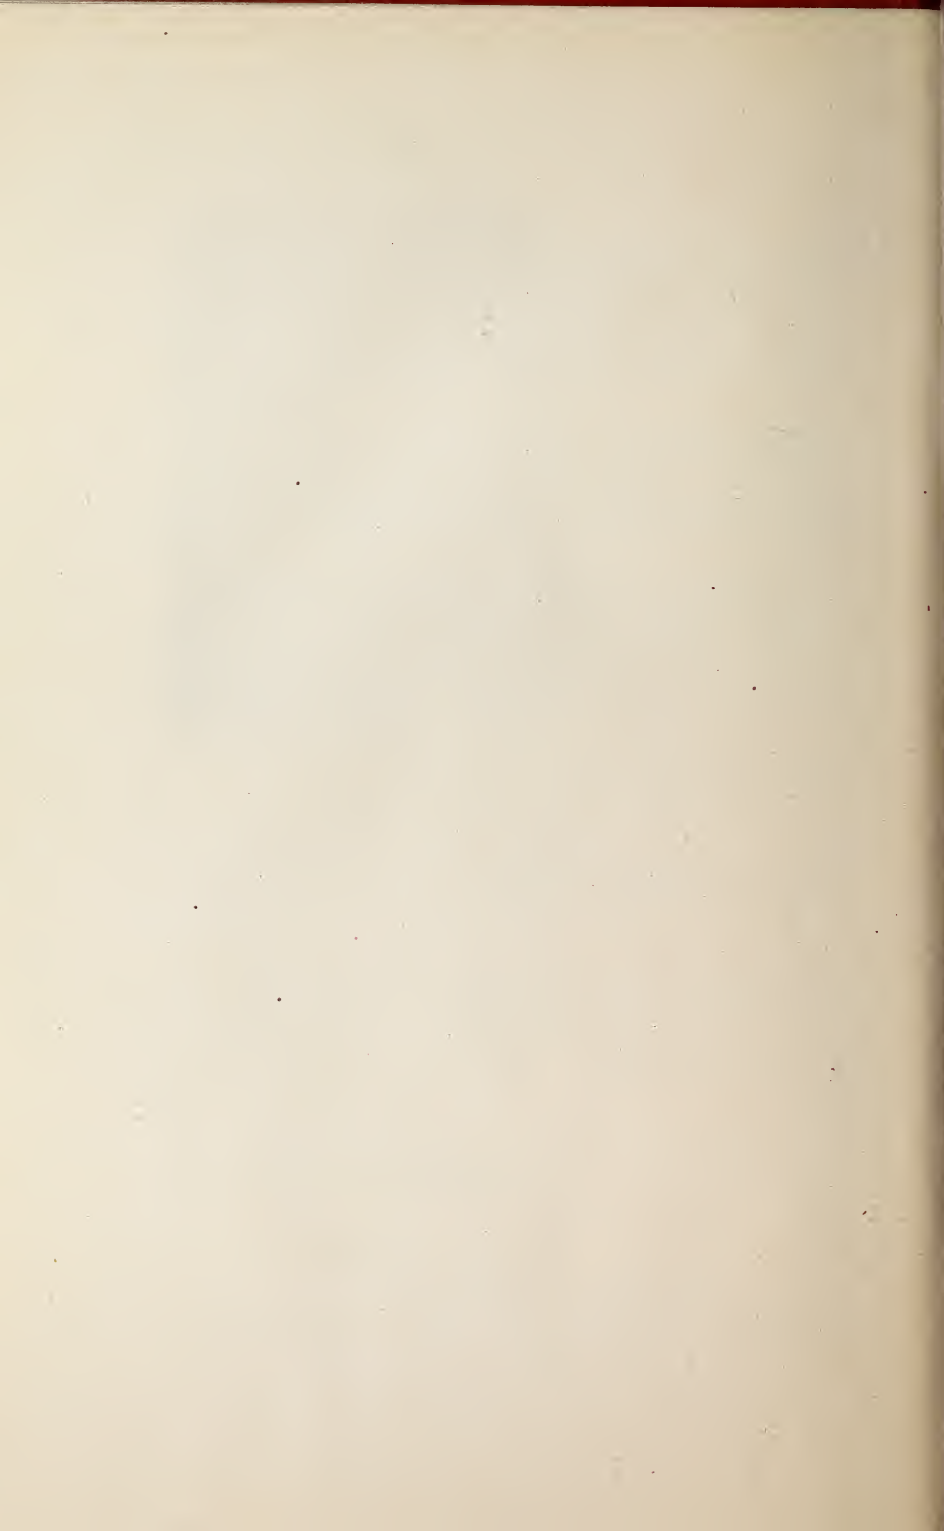

This year we received from the state \$5553.14. We certainly should be willing to raise at least, as much as we receive from the state.

In order that a sure foundation may be laid for the steady progress of our school work, may we not expect a generous educational policy so that the results which have appeared may be a promise of better results to come.

Tendering you sincere thanks for courtesies, co-operation and support, this report is

Respectfully submitted,

MYRON E. BENNETT,
Superintendent of Schools.

\$49463 98

From the foregoing appropriations we have paid :

G. A. R. posts,	\$150 00
Street policemen,	999 84
Street lights, 12 months to Feb. 1, 1903,	1360 51
Pay of firemen,	600 00
Fire alarm whistle,	300 00
Sanford Library,	300 00
Discount on taxes,	1892 41
Sewer plans,	580 00

We paid the fire companies the amount raised for aid, and in addition we have paid \$13.81 for repairs on the building and stove of the Alert Hose company and \$150.30 for three fire alarm boxes which this company ordered in 1900, and were not able to pay for out of the appropriations made for them.

SHED AND LOCKUP.

The lockup at Sanford became insecure, and in building the shed for road machines and tools we built a room 15x12, with cement floor, for a lockup, and put in it three iron cells, costing \$279, making the total cost of the shed and lockup \$558.06.

HIGH SCHOOL BUILDING.

Up to the time of making report last year there had been paid out on the new high school building \$15,005.75. We have drawn orders this year to the

amount of \$14,227.24, making the total cost of the building \$29,232.99. This includes the amount paid for insurance on the building, \$337.50, which was to have been taken from the amount raised this year for rent, insurance and repairs of school houses, but we did not do so as there was not enough money left from that appropriation. In pursuance of the vote of the town we have issued bonds to amount \$25,000, bearing interest at 3 1-2 per cent, payable on the first days of March and September, the principal payable, \$1000 Sept. 1, 1905, and \$2000 each year thereafter.

SIDEWALKS.

The Sidewalk appropriation of \$2,000 was not sufficient to meet the demands made upon us for walks. We exceeded the appropriation by \$1,207.93. This was caused in part by the expense of grading—a matter that should be taken into consideration in making estimates of the amount of money to be raised, and in part by having concrete gutters laid on both sides of Kimball street, and on the southerly side of Roberts street, all of which should properly come from the Highway money. The cost of these gutters was \$613.25, and we believe they will save their cost in a few years. We built walks on both sides of Kimball street, on the southerly side of Roberts street, on the northerly side of Washington street, from H. N. Leavitt & Co.'s store to the Averill printing office, and rebuilt on grade the walk on the southerly side of Washington street, from S. B. Emery & Co.'s store to Allen street, and a walk from Mrs. A. Garnsey's to new High schoolhouse.

In Springvale the walk on Main street, from the square to Stiles Brothers' store, was recovered; the walk on Paine street was recovered and extended to Mill

street, and a new walk was built on the northerly side of Oak street, from the square to A. L. Harmon's, and the walk on Frost street was rebuilt, and quite a portion of the walk on Depot street recovered.

PROHIBITION.

We believe there could be no greater menace to our growing prosperity than intemperance. We accordingly instructed the constables to do what they could to restrict the liquor traffic, and have paid them for their services.

HIGHWAYS.

J. W. Pike, road commissioner for the Northerly division, moved out of town in the fall of 1902, after the summer work was completed. With the assistance and suggestions of Charles W. Hussey, commissioner for the Southerly division, we make report of the highway department as follows:—

The amount raised for breaking roads in the winter was \$1000. The amount expended was \$764.98, leaving a balance unexpended of \$235.02. This we have added to the summer highway money. We have added to the summer highway expenses the amount of the overdraft on sidewalk account.

Balance from winter account,	\$235 02
Raised for summer work,	4000 00
Raised for Mt. Hope road,	500 00
Raised for Goodwin Court,	150 00
Raised for Davis street,	200 00
Raised for Makin's street,	150 00
Raised for Main street,	500 00

Raised for Cottage street,	200 00
Raised for Harrison street,	50 00
Raised for Pine street,	150 00
Raised for Honest street,	200 00

\$6335 02

F. N. and W. W. Hobbs, build- ing Mt. Hope road,	199 50
Overdraft on sidewalk account,	1207 93
	<hr/>
	\$5823 12

Amount undrawn,

\$511 90

From the amount unexpended should be deducted the amount raised for Makin's street, Davis street, and Main street. Mr. Makin was to be paid \$150 when the street over his land was built to the satisfaction of the selectmen. He desires another year to complete the work. Davis street, as it is now called, leads southerly from Cottage street. This street was not built as we thought it better that the sewer should first be laid. The rebuilding of Main street was awarded to George G. Plummer for \$790. The work is not yet completed and Mr. Plummer has drawn none of his money. He promises to finish the road in the early spring. His contract called for a rough stone bridge over Chapman's brook. Its great height and the newly filled dirt caused the stone used to press out during a heavy rain. We have now had split stone delivered by W. S. Butler, as appears by the above account, with the intention of placing a strong brick arch over the stream. The road when completed will have a 25 foot road bed, running on a substantially true grade from the beginning near the residence of Mrs. W. H. Frost to its end near W. H. Nason's "oak," with but one slight angle between these two points opposite the Newman lot, so called.

We suggest that an extra \$1000 be raised for highways this year and that the expense of these ways be paid therefrom.

The money raised for new streets and grading, except in the case of the Mt. Hope road and Main street, was laid out by the commissioner in whose district the work came, and is included in the amount expended by them as given above. Mr. Hussey has tried to clear all the roads in his division of bushes, and he believes that more attention should be paid to this matter than here-

tofore. Bushes beside the road are unsightly and inconvenient, and cause expensive road-breaking in the winter. If cut every year, a man with a scythe can mow a long strip in a day, and when dry they can be burned. After a few years of this treatment, they will be exterminated. This is more important than that all the roads should be turnpiked every year. In fact, Mr. Hussey believes much good road has been spoiled by too free and too frequent use of the road machine. With bushes cut, gutters clear, culverts open, and good bars on hills liable to wash, much needless expense would be saved. Since the advent of the road machine and the trotting horse the old fashioned bars have disappeared from nearly all our hills, as have also the banks of turf at the sides of the road, leaving nothing to protect the hills against heavy rains. The expense of repairing roads has not been reduced by the road machines. It should have been, and the roads should have been kept at their original width, with but one gutter on each side.

SEWERS.

The sewer plans as made by W. M. Ames, C. E., of Berwick, provide for one out-let at Washington street bridge for the northerly section of the village, and one at the foot of Emery street for the southerly section. East of the river there is an out-let near the Worsted mill for the section to Spruce street, and one at the foot of Island avenue, below the dam, for the section east of Spruce street. The section west of Main street is drained into Cold Spring brook.

At Springvale the out-let for the section west of the river is down across the print works, near G. H. Robert's house, to the river, with an out-let at the foot of

Frost street for the section below the town house. Mill street and the section north of it, empts at Mill street bridge, and Paine and Depot streets empt just below Smith's planing mill, with one out-let near the railroad for the section below the creamery.

We here insert the report of Mr. Ames, who had charge of the sewer construction. Nothing need be added to his report, except that we have expended \$3996.29, the cost being divided approximately as follows: Oak street, \$500; Emery street, \$275; Cottage street, \$2200; Cross street, \$350; Tebbetts avenue, \$600. \$2000 was raised for sewer work, and by vote of the special town meeting we were authorized to continue the Cottage street division and borrow money for the same. There is a considerable quantity of pipe left over. We fixed the price of entering the sewers at \$15. Many have entered and paid the treasurer.

Report of Civil Engineer.

To the Selectmen of the Town of Sanford, Maine :

GENTLEMEN—I respectfully submit the following report on Sewer construction :

OAK STREET.

The Oak street sewer was laid according to the plan adopted by the town, and consists of 615 feet of 8-inch pipe, three manholes and two catch basins.

This sewer should discharge into the Riverside avenue sewer and thence to the Washington street outfall, but as these sewers are not yet built, a temporary outfall 175 feet in length was laid to discharge into the pond at the foot of Oak street.

Nearly all the houses on the street have been connected with this sewer, and the present discharge into practically still water cannot be considered a sanitary measure; hence the Riverside avenue sewer should be constructed as soon as the necessary funds are available.

TEBBETTS AVENUE.

The sewer on Tebbetts avenue was laid this year, chiefly as a means of relieving the flooding of Main street between Jackson street and the Fair grounds.

With this end in view the outfall was laid into the low ground in the pasture of S. B. Emery, and no house

sewers will be allowed connected until this is changed to conform to the plan, by discharging into the Jackson street sewer, and thence through Allen to Emery street, emptying into the river at the foot of the latter street.

About 700 feet of 12-inch pipe was laid and two manholes and two catch basins were built, one of the manholes and both catch basins being on Main street.

COTTAGE STREET OUTFALL.

This is by far the most important sewer constructed during the year, both as regards the work of construction and the results obtained.

This sewer is of 20-inch pipe from the outlet at the river to the northerly side of the land of the Goodall Worsted Co., and of 18-inch pipe from this point to Cottage street.

While this sewer is to serve as a trunk sewer for all the territory between River and Brook streets and as far north as the houses extend, the *immediate* object of its construction is to drain the pond, or more properly bog, back of the Worsted mill.

Just how far we have been successful is not yet fully determined, for although the ground water has been removed and what was an impassable swamp has become dry and hard enough to bear a man's weight, there are still a number of private sewers discharging upon this area which will no doubt create a nuisance during warm weather. This can and should be remedied by putting in the Spruce street sewer and having all the house sewers connected with it.

The private sewer from Cottage street was connected with the 18-inch pipe in Davis avenue. This sewer was found to be in bad shape and should be discontinued, or

used only for surface water as soon as the new sewer is laid in Cottage street.

The summary of work done in this section is as follows :

- 20-inch pipe, 700 feet.
- 18-inch pipe, 450 feet.
- 6-inch pipe, 400 feet (underdrain).
- 5 manholes.
- 1 catch basin.

CROSS STREET.

On Cross street 550 feet of 8-inch pipe was laid and three catch basins built. This drain was connected with the Emery street sewer, which was put in about a year ago, and serves to drain Cross street and a part of Elm street.

EMERY STREET.

To drain the low portion of Emery street near Main street, an 8-inch pipe was laid to connect with the School house sewer. This drain consists of 400 feet of 8-inch pipe, three catch basins and one manhole.

The cost of construction has been very reasonable as the sand and gravel soil is more easily handled than the heavy soil of many places.

While the need of a complete system of sewers must be apparent to all, I would especially recommend that sewers be constructed on Cottage and Spruce streets, as soon as possible to connect with the sewer just laid, for until this is done the best sanitary condition in that section cannot be obtained and therefore the full benefit of the sewer already in will not be realized.

Much might be said in general as to the need of sewers in the town of Sanford, and much in detail as to the especial need of different sections of the village, but in the end the whole matter must be decided by the judgement and discretion of the citizens, hence I will refrain from any attempt at expert advice.

Yours truly,

W. M. AMES,

Civil Engineer.

Berwick, Maine, Jan. 1, 1903.

Pauper Expenses.

	<hr/>
	\$1461 06

Further expenses of the farm have been met by apples, \$2.00; pumpkins, \$0.50; eggs, \$25.60; butter, \$35.67; veal, \$26.88.

There has been built a hen house, 12x40, during the year.

There are now on the farm—5 cows, 1 horse, 50 hens, 3 tons of hay, 1 bbl. pork, 4 bbls. cider, 10 cords wood, 25 bu. potatoes, 10 bu. apples, 1 1-2 bbls. turnips, 1 bu. beets, 1-2 bu. onions, 1-2 bu. carrots, 1 bu. parsnips, 1-2 bu. beans, hay rake, mowing machine, horse sled, work wagon and cart, pump, wagon, harness, fur robe, plow, cultivator, harrow, wheel barrow, and a good supply of dishes, bedding and furniture, a list of which is recorded in the Selectmen's records, page 17:

There are now on the farm—John P. Shaw, 55; Nelson Londo, 79; Samuel Porter, 83; Horatio Willard, 68; Lizzie Goodwin, 76; Julia Londo, 52; Lizzie Rollins, 64; Polly Lingard, 33.

There have died on the farm during the year—B. L. Bragdon, March 22, 1902; Mary Cooligan, Nov. 4, 1902; Eva Gonger, Dec. 4, 1902; Horace Pray, Jan. 17, 1903; Mrs. Catherine Callahan, Feb. 2, 1903.

George Gonger, wife and three children were on the farm from October to January, and Mary Houle and three children about six weeks and Horace Pray about four weeks.

The management of the farm by Mr. and Mrs. George J. Fletcher was very satisfactory to us. Mr. Fletcher was a willing worker and a practical farmer, well adapted to the care of the sick and the aged. The town lost a faithful servant in his death, Feb 12, 1903.

W. H. FOLSON, Auditor.

Sanford, February 21, 1903.

REPORT

OF THE

Superintending School Committee.

That this growing and prosperous town should have good schools is a matter of first-rate importance. That our schools should be as good as any in the State is a laudable ambition, and an achievement easily within our grasp, if not, indeed, already an accomplished fact.

In recent years there have been added well-graded courses of study, departments of Music and Drawing, with most excellent teachers for each, a better supply of the best text books, and other notable improvements.

We have also the new High school building in every way exceedingly satisfactory, and for its cost not surpassed by any building in New England.

It seems to us that the town has also taken the right position in employing a superintendent of schools to give his entire time to the care of our school interests.

Each year the number of pupils in attendance is increasing. This is in a marked degree true of Sanford

village. More school room will soon be required. In fact, at least one additional room is now an urgent need in Springvale village.

With the utmost economy the present school year of thirty-six weeks cannot be continued, and a year added, as it should be to the common school course of study, in order to prepare suitably for the advanced High school work which we ought to be doing, without a considerable increase in the amount of money appropriated by the town.

This additional year of study, and the enrichment of our High school courses of study after plans already matured, are precisely the things needed to put our schools abreast of the very highest in the State.

That this should be done appears to us not too high an aim, nor its cost a thing unreasonable.

As your superintendent of schools has repeatedly shown in his annual reports, our town occupies no enviable position as to the amount of money per capita annually voted for the support of its schools, standing as it does near the foot of the list. We keenly appreciate that much money is needed for other purposes, but we would respectfully urge the equal, if not paramount claims of the cause of public education.

Nothing presents stronger attractions to those contemplating making their homes with us than the existence here of schools, from the lowest primary grade to the last year of a High school course which fits for college, Technical school, or for the business of active life,—schools as well taught, as thoroughly furnished, as well appointed, as comfortably housed, as skillfully and carefully superintended, as can be secured with any reasonable outlay.

Even to sustain the school plant we now have, including the expense of running our splendid new building, and retaining our every way pleasant and helpful departments of Drawing and Music, and our magnificent corps of teachers, nearly all of them either Normal school or college graduates, or with equivalent training in the school of experience, will require a per capita appropriation much larger than has hitherto been the custom, but not larger than that made by most other cities and towns of similar population and resources.

We confidently ask and expect that our fair-minded, far-seeing and public-spirited citizens will give to their schools this support which is not, indeed, extravagantly generous but eminently just and wise.

The following amounts are necessary to maintain our schools for the coming year:

Common schools,	\$8,000
Books and supplies,	1,000
Insurance and repairs,	1,000

The amount to be raised for the High school department, will depend wholly on whether the present high schools are united or not.

MRS. J. D. WEYMOUTH,
J. E. COCHRANE,
E. E. HUSSEY.

School Committee.

REPORT

... OF THE ...

Superintendent of Schools.

To the School Committee of Sanford :

I hereby present my Annual Report for the year ending December 31, 1902.

ENROLLMENT.

NEW HIGH SCHOOL BUILDING.

The present year must be considered an important one in the history of our schools, as it marks the completion of the most convenient and most satisfactory building ever erected by the town. It was completed September 6th and is now occupied by the High school, grade 8 and grade 7. The building is three stories high with a basement high posted and well lighted. The walls are built of Westbrook brick with the outside course laid up in red mortar. The trimmings are native granite. Pennsylvania slate is used for the roof.

The basement contains two furnace and fuel rooms, two fresh air rooms, janitor's room, boys' lavatory and play room and girls' lavatory and play room. These lavatories are fitted up with the latest pattern of fixtures which were furnished and installed by James H. Makin.

The first floor contains four class rooms, 28x32, with slate black-boards, bookcases, etc. In every instance the light comes only from the rear and the left of each pupil's desk. The wardrobes are constructed on either side of a well lighted and thoroughly ventilated corridor. These wardrobes are made of wire mesh work, and allow a complete circulation of air at all times. The drinking fountains on this floor are so constructed that dippers are unnecessary, thus preventing any possibility of the pupils contracting diseases.

The second floor contains the High school assembly room, three recitation rooms, chemical laboratory, principal's office and toilet, teachers' room and toilet. Wardrobes are arranged in the corridors the same as on the first floor.

The third floor contains an assembly hall with a seating capacity of four hundred.

The building is finished throughout in cypress, with kiln dried maple floors. Electric bells and speaking tubes connect all the school rooms, the basement and the library with the principal's room.

The heating and ventilating plant was installed by the Fuller & Warren company of Boston. The written agreement, held by the town demands the following requirements:

1. That the apparatus will, with proper management, heat all the rooms, including the corridors and assembly hall to 70 degrees F. in any weather.

2. That, with rooms at 70 degrees and a difference of not less than 40 degrees between the temperature of the outside air and the air entering the room at the warm air inlet, the apparatus will supply at least 30 cubic feet of fresh air per minute for each scholar accommodated in the rooms.

3. That such supply of air will so circulate in the rooms that no uncomfortable draught will be felt, and that the difference in temperature between any two points on the breathing plane in the occupied portion of a room will not exceed 3 degrees.

4. That vitiated air in amount equal to the supply from the inlets will be removed through the vent ducts.

The past winter having been unusually severe, we have had an excellent opportunity to test the plant. As a matter of fact, with the exception of two days, only one-half of the heating apparatus has been in operation at any one time.

The general contractor, Mr. Isaac J. Young, performed the work in an unusually satisfactory manner.

Credit is also due Mr. Fred M. Libby, who besides preparing the plans, supervised the work in a general way.

THE ELEMENTARY SCHOOLS.

Classification and Promotion of Pupils.

Of the many difficult problems which confront those who are responsible for the organization and administration of the public schools, no other is more perplexing than this one of classifying and promoting. No other affects more vitally the present and future welfare of the pupils in the schools.

All must admit that teachers vary greatly in knowledge, power, skill and many other ways affecting their efficiency. None will deny that the children of every grade differ widely in age, in acquirements, in physical endurance, in power of attention, in the regularity of attendance, and in many other ways influencing their progress, yet, because of the manner of our old system of grading and promoting, there was a strong tendency to keep all of the same grade in intellectual lock-step, not only month after month, but year after year for their whole school lives. Children are not alike in ability or in any other way, and God never intended that we should be held responsible for making them alike.

At the beginning of the fall term we installed a system which we hope will overcome the old lock-step method. While this system is new to Sanford, it has

stood the test for ten or more years in many of our larger towns and cities.

As it would be the height of folly to adopt a system without considering the local conditions, after a careful study of some most excellent systems in other places, I have attempted to work out a plan which will so combine the advantages of class, group, and individual teaching as to make it possible to suit the instruction to the needs of the individuals and enable each to go just as fast as the work can be well done, and no faster.

It is by no means a plan for hurrying pupils through the grades. To use an agricultural expression, it is to allow those who are able, to cut a wider swath.

Under the old system the pupils who could carry all of the work remained in school; others, becoming discouraged, dropped out. Under the new system, we aim to provide for all, "the mentally strong and the mentally weak, the physically strong and the physically weak, the permanent and the transient." Those who cannot do the nine years' work in six years may do it in seven; those who cannot do it in seven years may do it in eight; those who cannot do it in eight may, without the slightest loss of self-respect, do only the required work.

That the success of the new system is assured is demonstrated by the teachers' hearty co-operation in perfecting it.

Teachers' Meetings.

The teachers of our town are to be congratulated for the spirit of self-improvement which they have manifested during the year. Besides attending the regular meetings at the superintendent's office, the local teach-

ers' association have presented two special conventions. Several teachers attended the State convention, held at Waterville in December, and already more than one-half of the entire teaching force, have arranged to attend the meeting of the National Educational Association, at Boston, July 6-10. These facts are silent reminders that the town did not meet with any loss when the School Board increased the teachers' salaries.

Rural Schools.

It is very refreshing to report a truly successful year in our rural schools. With two exceptions, every teacher has had a normal school training. The advantages of this training are manifested in the attractive school rooms, the well arranged program, the methods of questioning, the neat written work, etc.

I feel safe in saying that our rural schools have never been more progressive than they are at present.

High Schools.

The revision of the High school course as sanctioned and recommended by the School Board, is not yet completed. It will, however, be completed and in operation at the beginning of the new school year.

In the past there has been too much time devoted to the college preparatory work, when as a matter of fact, less than three per cent. of our High school pupils have entered college. While I firmly believe that our High school should have a course which will prepare pupils to enter college; I do not believe that we should prepare a course of study without *first* considering the 97 per cent. who do not enter college.

Too many pupils have entered our high schools with the false idea, that they must study Latin and Greek if nothing else. It is not my purpose to degrade the value of these studies when they are in their proper sphere. But in arranging a course of study, local conditions should be considered. It is my opinion, that in a town made up as ours is, largely of a manufacturing community, that there should be many studies of more importance to the future life of the pupils than Latin and Greek. Accordingly the new course will be arranged with this idea in view. A strong English course, a two years' Commercial course, and a complete College preparatory course will be offered.

The work in both High schools during the year has been very satisfactory. An unusual amount of English work has been done in both schools. At the Sanford High school the work in Chemistry should have special mention. With the new laboratory and its equipment the pupils have found what used to be a very dry subject is now a most fascinating one.

Evening School.

At the request of the Board of Health, the evening school was not opened this winter. While it was unquestionably the proper thing to do, it was also a disappointment to those who have been deprived of the benefits of the day schools.

Music and Drawing.

These special studies are no longer a matter of experiment but are now a permanent part of our school system.

In the Music department Miss Frost has manifested the same progressive spirit, which has characterized her work in this department for a period of three years.

The public schools met with a distinct loss when Mr. Randall resigned from the Art department, at the end of the spring term. He possessed those sterling qualities of integrity and regularity which are always necessary for a successful teacher.

Miss Eva E. Bunker of Durham, N. H., was recommended by Mr. Randall to continue the work in this department. She has very wisely followed the course outlined by her predecessor. Some of the work which has been done during the year is on exhibition at the Emerson building, and is certainly a very creditably showing.

The generous educational policy which is necessary to lay a sure foundation for steady progress in school work should receive the support of every voter in this town. During the last three years eight new teachers have been added to the teaching force, one extra janitor besides a new building which requires an annual expense of \$400 for heating and incidentals. The total extra expense per year is now three thousand four hundred and ninety-six dollars. To cover this extra expense the town has raised five hundred dollars extra, or two thousand nine hundred and ninety-six dollars less than the actual extra expense. I need not remind you this town has had a large increase in its population, during the last three years. In the schools we have had an increase of two hundred pupils, and it is not necessary to present any argument to prove the expense must also increase. There are over four hundred towns and cities

in Maine, that are annually raising more money per capita, for the schools, than Sanford. I trust that these facts will receive your careful consideration.

To the school board, teachers and citizens, I wish to tender my sincere thanks for courtesies, co-operation and support.

Respectfully submitted,

MYRON E. BENNETT,

Superintendent of Schools.

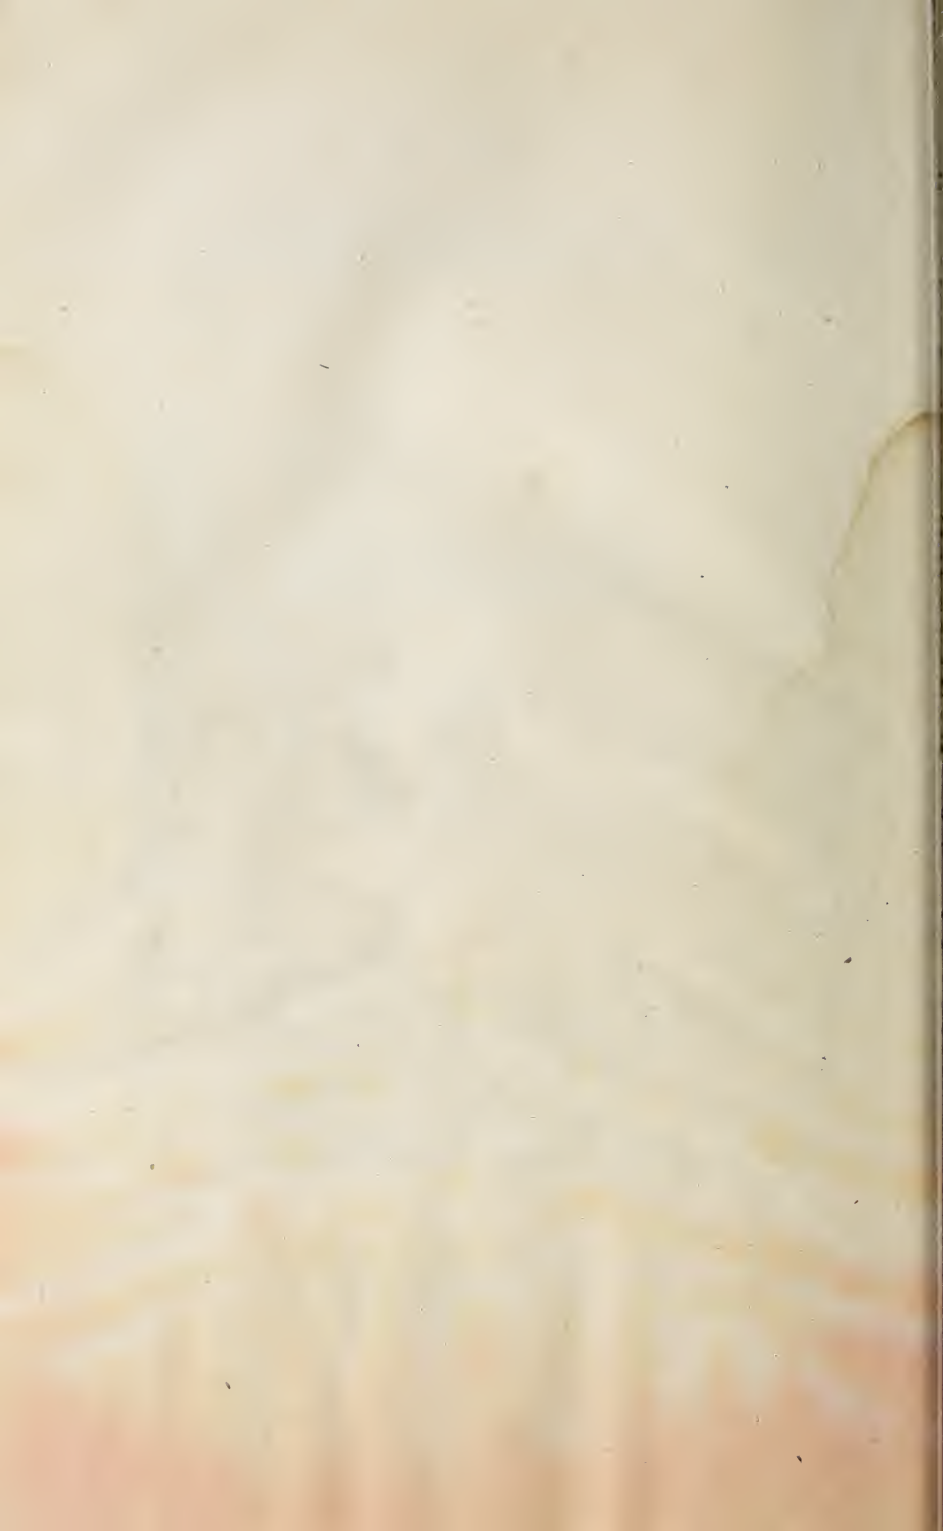

Teachers' Directory, 1902-1903.

REPORT

OF THE

Supervisor of Music.

Mr. Myron E. Bennett, Superintendent of Schools:

DEAR SIR: I hereby submit my report of the music department for the year ending December 31, 1902.

Music has now been taught in the schools of Sanford three years, having been first introduced as a system in the spring term of 1900.

The Normal Music course, which has been adopted, is one of the best courses to be had, presenting the science of music in a thorough and progressive manner, while the songs and exercises are of such a character as to cultivate in the pupils a taste for the best in music. We have in use the first and second series of charts, and the first and second readers. Two-part singing is taken up as soon as the ability of the pupils makes it practicable, and in the seventh and eighth grades three-part singing is practiced. Supplementary books have been used for additional songs.

Prominent educators agree that music is second to few, if any, studies in value as a mental discipline, the

necessity of doing a given thing at a given time developing habits of quickness and accuracy. Some musical talent is found in nearly every child, and, if all children are trained in music, the proportion of adults who are unable to sing will be very much smaller than without this training. All children may have sweet voices if they are properly used, and the preservation of the child's voice in its natural sweetness and purity is of prime importance. In this work the efforts of the music teacher must be supplemented by those of the grade teachers if the best results are to be accomplished. As fast as practicable the music lessons should be made a feature of every day's work in the school room. It is impossible for one teacher to visit every room daily, but a few teachers already give me valuable aid.

The beginning of every term finds the pupils in each grade farther advanced than those of the same grade the year before, and it will be my endeavor in the future to make each term's work an improvement over the last.

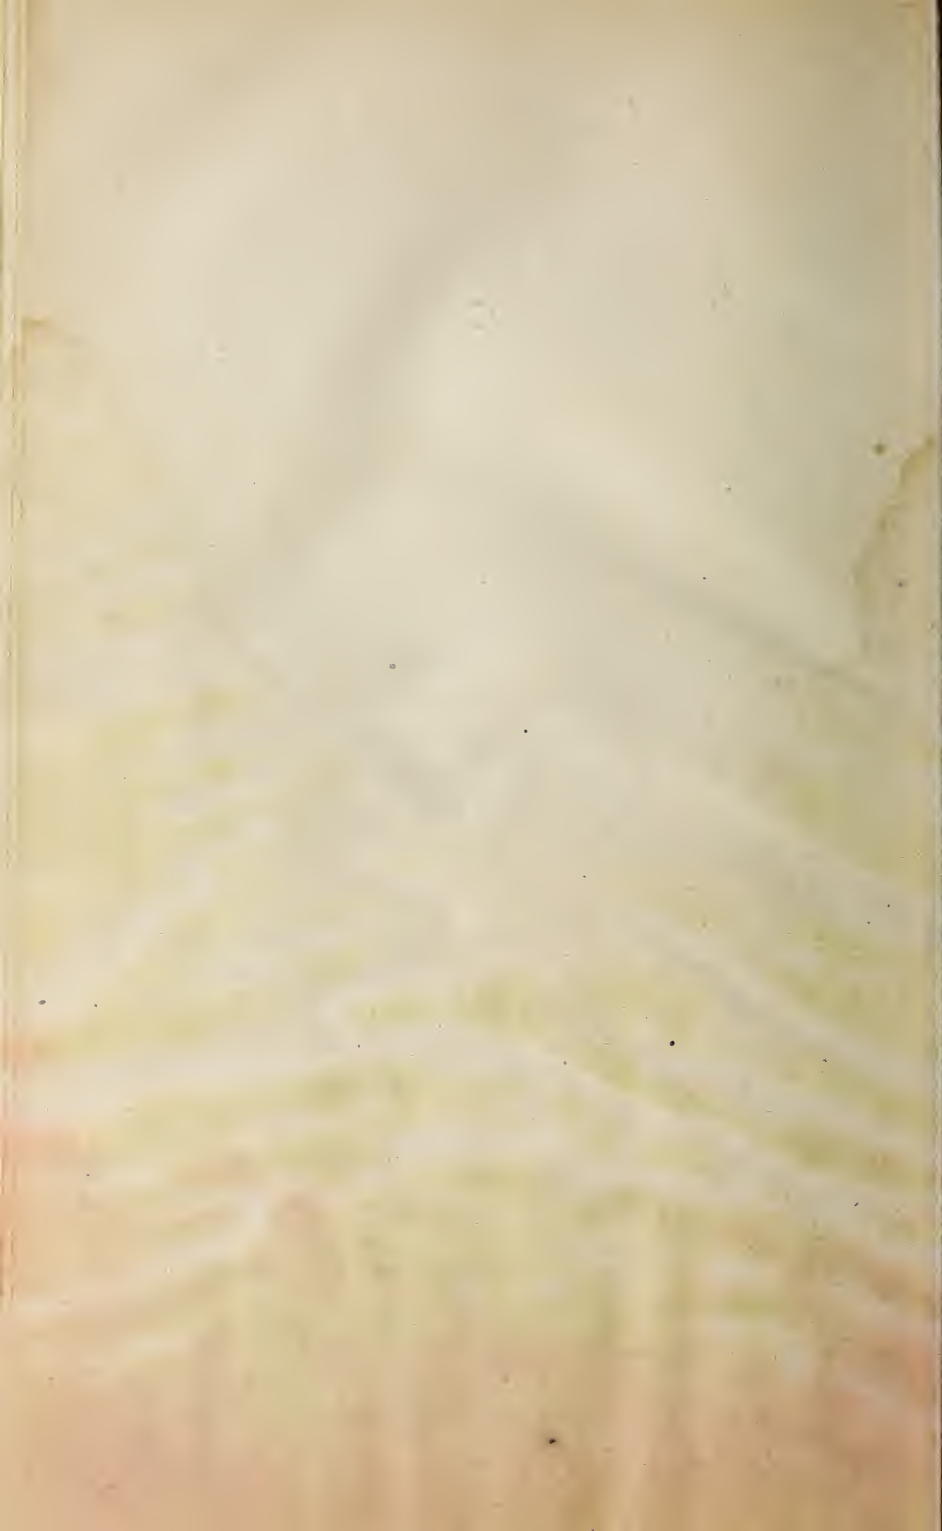

In closing, I wish to thank the superintendent and all the teachers with whom I have worked for their hearty co-operation.

Respectfully submitted,

SUSAN E. FROST,

Supervisor of Music.

TIMBER

x x x

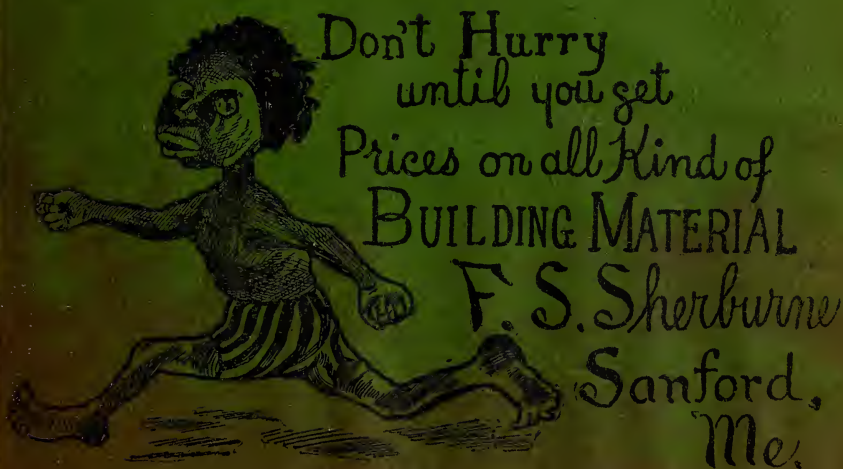

Have you any Timber lots to sell? If you have you would do well to talk with **SHERBURNE** before selling.

If you have any Timber land that you would like to exchange for a House in Sanford, **SHERBURNE** has several desirable houses.

If you would like to have a house or a stand of buildings built you cannot get as good value for your money of any other contractor in Sanford as you can of

Fred S. Sherburne,

as he has got the best facilities for doing good work, and, with his assistant, Moses S. Moulton, he CHALLENGES competition.

The Largest House Furnishing Store

— IN YORK COUNTY, —

S. B. EMERY & CO.

Furniture !

Four large floors devoted to this Department alone.

Our Ranges !

The Sterling, Crawford and Herald are unsurpassed in material, fit, finish and operation, are guaranteed to roast any meat, bake any bread, and always give fine results.

TOWN HALL.

The work was in charge of F. J. Chamberlain, under the supervision of Selectman Frost. The amount expended for repairs and additions to the building is \$1082.02, for scenery \$137.00, for paper and papering \$44; total \$1263.02.

SEWERS.

Amount raised,	\$10,000 00
Amount expended,	10,485 94

Sewers have been laid at Springvale from the river through Frost street to Main street, and from near the railroad crossing up Main street to Wentworth's block; and at Sanford, through the northerly half of Davis street to Cottage street, through Cottage street, down River street from Cottage street to Lizotte's store, a short distance on Brook street southerly from Cottage

street, through Spruce street and across from Spruce street to the main sewer on Davis street, and through the two proposed streets leading from River street to Davis street; and on the west side of the river from Washington street bridge through the mill yard and along Riverside avenue connecting with the sewers on Water and Oak streets. The work was done under contract with Fred Thornton of Lewiston under the supervision of W. M. Ames, C. E. We have from \$500 to \$800 worth of pipe left over, and have received about \$300 for sewer permits. We are therefore within the limits of our appropriation.

Springvale Aqueduct Co., trough on Honest street,	3 00
	<hr/>
	\$7007 40

In the pay rolls of Commissioner Hussey is included the work of grading Spruce street, about \$225, repairing Berwick road, about \$250, building Davis street, about \$150; grading over the stone arch bridge at No. 1 mill, about \$50, and work done on Main street, about

\$400. We departed from the original plan on this last road and made the roadway 50 feet wide instead of 25 feet. This made a large increase in the cost of the road but the change is much appreciated by travelling public.

Pauper Expenses.

TOWN FARM.

Estate George J. Fletcher, services,	\$220 53

\$4038 69

Amount overdrawn,

538 69

At the request of the business men and in accordance with frequent suggestions made at town meetings, we have purchased two sets of watchmen's recording clocks with four boxes each, to be placed at proper stations in each village, by winding which the watchmen will show where they were at certain hours. This will be a protection to the policemen against unjust criticism and to the public in case there should ever be on guard a man inclined to shirk his duty.

FIRE COMPANIES.

Amount raised for supplies,	\$800 00
Boston Woven Hose & Rubber Co., hose for	
Alert Hose Co.,	367 00

Auditor's Report.

This is to certify that I have examined the accounts of the town of Sanford, as shown me by the selectmen, and find them correct.

W. H. FOLSOM, Auditor.

Sanford, Feb. 22, 1904.

REPORT

OF THE

Superintending School Committee.

To the Citizens of the town of Sanford:

Herewith we present our annual report together with the report of the superintendent of schools for the past year. As the superintendent has covered the ground in detail we will only speak of a few things in a general way. We feel satisfied that the schools have been run as economically as is consistent with the high grade of work which has been done in the past few years and which we wish to continue. To do this it is of course necessary that the appropriations shall be equal to the expenditure. The amount needed for the common schools is \$10,250. This sum includes \$1,000.00 for the superintendent. For the books and supplies it is absolutely necessary that you raise \$1,000.00. Last year you only raised \$800.00 which was inadequate to the maintenance of the regular books which became worn and soiled from use. Repairs and insurance call for \$2,000.00. This amount is larger than usual, but it is necessary to make quite extensive repairs to the Lincoln school building in Springvale and to do this properly it will cost from

\$1,000.00 to \$1,500.00. To continue the two high schools it will be necessary to raise \$2,836.00. We take this occasion to again urge the advisability of only maintaining one high school. The advantages to be gained by this change are so great that if once tried you would not wish to revert to the old method of two separate schools.

We are very much pleased with the work of our superintendent and teachers, and feel that with few exceptions the highest efficiency is being maintained both in education and discipline. If the parents would take a more personal interest in the schools by visiting and learning from actual observation just what is being accomplished, they would be justly proud of the present school system.

Respectfully submitted,

E. E. HUSSEY,

MRS. J. D. WEYMOUTH.

School Committee.

REPORT

OF THE

Superintendent of Schools.

To the School Committee of Sanford

I have the honor of submitting to you, and through you to the citizens of the town, my fifth annual report.

The progress of education during the last year has been very satisfactory; indeed, it is not too much to say that it has been gratifying beyond anything we had expected. The results of the year's activity is not shown in statistics altogether, but rather in an awakened interest in all that pertains to education, in a more cordial support given our educational workers, in larger enthusiasm in the teaching force. Our citizens are looking more to the kind of training their children are receiving. Our teachers are becoming more professional, and are putting forth greater efforts to prepare themselves for efficient service, as is attested by a greatly enlarged attendance upon the teachers' institutes, associations and local meetings.

Enrollment.

Total number of different pupils registered,	1048
Average attendance during the year,	873

In the year 1903. every citizen owning property valued at \$5,000, paid about \$25.00 for the education of 1,048 children, or two cents and four mills for the education of each child. If he was fortunate enough to have three children attending the public schools, the town paid for all their instruction, supplies included \$64.00. If the same taxpayer was unfortunate enough to have no children to educate he certainly should be glad to have the privilege of paying two cents and four mills, (or ten times that sum if need be) for the education of the children of some poorer man. Listen to the argument made by Daniel Webster, in 1821, "For the purpose of public instruction we hold every man subject to taxation for public education in proportion to his property, and we look not to the question whether he himself have or have not children to be benefited by the education for which he pays; for we confidentially trust that by the diffusion of general knowledge the political fabric is made secure." Again allow me to quote from the late Frank A. Hill, Secretary of the Massachusetts Board of Education: "Sometimes, hard-headed business men—find themselves wondering if it all pays,—the better teachers, the smaller number per room, the greater concern for the individual, the richer equipment, the more commodious buildings, and all the rest. The sentimental dividends are well enough, but is our money coming back so that we may keep up the pace? Well, it is a fair question. Here is one answer to it. You may have seen it, but it will bear repeating. Doctor

Harris, United States Commissioner of Education, has called attention to the fact that each child in Massachusetts receives an average of seven years' schooling, while each child in the United States at large receives only 4 3-10 years' schooling. The ratio is 70 to 43. Now the average earning power of each person in Massachusetts is 73 cents per day while for the country at large it is only 40 cents. The ratio is 73 to 40, the excess being 33 cents per capita. That is to say the larger earning power goes with the larger schooling; and the excess in one case follows hard upon the excess in the other. Now this cannot all be a mere happening. If it is true that intelligence produces more than ignorance, then excess in wealth-producing power must hold some relation to excess in knowing and doing power."

Yet, over and above all, the primary question is not whether a man can make ten dollars per week, uneducated, or twenty dollars per week, educated; it is how can he make the most of himself, how can he best develop his personality, how can he accomplish the greatest good for the greatest number?

A bright young pupil recently asked, "What good will it ever do me to study algebra?" He was measuring the value of knowledge by this little tape-measure whose divisions are the symbol \$. It was explained to him that mental advancement accruing from disciplining the mind to systematic reasoning; that while he might never use what he learned in the exact form in which he learned it, and while he might apparently forget it, yet the effect of his study would remain through life in the ability to think better and to grapple more successfully with difficult problems.

Total	423	504	927	792	159	945

No fair comparisons can be made as to average attendance or total registration with the statistics of last year because of the large number of pupils who have left the public schools to attend the parochial.

Departments of Music and Drawing.

Music as well as drawing is without doubt one of the branches of education which the public schools should teach. These subjects are taught in every grade and in such a manner as to unify and vivify the fundamental subjects of elementary school work, for though our schools are established primarily to teach reading, writing, spelling and arithmetic there is no way of making these very important subjects more interesting and practical than to lift them out of the dull routine of the past and to make them touch many phases of life and thought instead of one.

Report of Instructor of Music.

Mr. Myron E. Bennett, Superintendent of Schools,

DEAR SIR:

The instruction in music in the schools in Sanford has been carried on this year with the same general plan as that reported a year ago, and with the use of the same books and charts, those of the Normal Music course, which constantly prove practical and helpful. In the fifth and sixth grades of Longfellow school it was found necessary to introduce a new book containing two part work, and Book II of the Cecilian series of Study and Song was chosen. The excellent exercises and the many pleasing songs in this book have proved a continual source of pleasure and profit to the pupils during the year.

In April, 1903, the pupils of the eighth grade in

Lincoln school, assisted by some from the High school and a few from the lower grades, presented in the town hall, with much credit to themselves, a musical entertainment consisting of an operetta, choruses, etc. With the proceeds of this entertainment two reliefs were purchased for the decoration of the room now occupied by the eighth grade, and some money was given to the High school towards the purchase of new singing books.

The work done by the pupils as a whole has been more satisfactory this year than last, and I wish to again acknowledge the kind co-operation of the superintendent and teachers.

Respectfully submitted,

SUSAN E. FROST,

Instructor of Music.

Manual Training.

I wish to renew my plea for a beginning at least of manual training in our schools. In reply to questions often asked concerning the advantages of manual training allow me to present the following very terse argument made not long ago by one of the most prominent educators in our country. "During the last fifty years, on account of industrial changes the population in our country and in most of the civilized countries of the world has been rushing into cities and large towns. We must take account of the immense change wrought by this movement in the environment of every child's life.

When a child grows up in the country it gets a natural training in accurate observation. It wants to find a four leaf clover; it runs to see where the green snake went to; it tracks the wood-chuck to its hole and gets it out; it learns the song of the birds; and knows when the smelts run up the brooks. In, short, the country child gets naturally a broad training in observation. It also has on the farm an admirable training in manual labor. From an early age it can actually contribute to the care of animals, the successful conduct of the household, and the general welfare of the family. In the city and large towns all this natural training is lacking, and substitutes for it have to be artificially provided. This necessity has brought into our schools nature study and manual training, to teach the child to use its eyes and its hands, and to develop its senses and muscular powers; and these new beneficent agencies in education, already well in play, are in the near future to go far beyond any stage at present reached."

High Schools.

A common fault in our high schools has been that the instruction was too little considered as a continuation of the earlier work of the common schools, and too little treated with reference to an adequate basis for all the work that is to follow, and the instruction in foreign languages was introduced too soon. I am pleased to report that this fault is disappearing.

The new course of study is firmly established and the only need which I would urgently recommend is,

the instruction in stenography and typewriting.

It has been said that much is taught in our high schools that has no visible effect. Let me say that I greatly prefer that which has an invisible effect to that which has a visible effect. I greatly prefer the high school graduate who goes out with little knowledge but with a great hunger for knowledge to the one who has a great mass of information but little hunger, who knows it all already and does not need to *learn* anything. Above all, it matters not so much what is taught as how it is taught. "Man lives not, nor shall live, by the bread alone that the school crumbles for him." He lives also from that which other forces reach out to him; the force of the family, that of the church, and that of the entire life of the people. These forces also must share in the school; must take hold and cooperate with it. Then we will be able to bear individual imperfections without injury.

Finally, I believe that it should be decided once and for all, whether the town will unite the high schools, or not. If it is your will to maintain two high schools, then I recommend that a sufficient sum be raised to bring the equipment of the Springvale high school up to that of the Sanford high school.

The generous educational policy of this town has helped us to lay a sure foundation for that steady progress in school work which is, I trust, now well begun so that the results that now appear are only a promise of better results to come. I need not remind you that we have an excellent corps of teachers who are intensely interested in their work, loyal and patient under criticism.

Tendering you sincere thanks for courtesies, cooperation and support, this report is

Respectfully submitted,

MYRON E. BENNETT,

Superintendent of Schools.
